RE: Proposed UCSQ Development of Inclusion Area D, Santa Cruz County.

Dear Ms. Siskin:

A record search of the sacred lands file has failed to indicate the presence of Native American cultural resources in the immediate project area. The absence of specific site information in the sacred lands file does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in the project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend other with specific knowledge. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-4088.

Sincerely,

Debbie Pilas-Treadway

Ramona Garibay
Representative
Trina Marine Ruarno Family
37974 Canyon Hts. Drive
Fremont, CA 94536

Subject: Cultural Resources Investigation for the University of California, Santa Cruz, Santa Cruz County, CA.

Dear Ms. Garibay,

Jones & Stokes is conducting cultural resources studies for a project in the City of Santa Cruz, Santa Cruz County, CA. The proposed project location is in between the northwest and northeast quadrants of the Santa Cruz 7.5' USGS quadrangle, and is indicated on the attached map. The project area is located in Range 2 West/ Township 11 South at the intersections of sections 10, 11, 14, and 15.

A record search was conducted at the Northwest Information Center at Sonoma State University on October 10, 2002. Based on the archival records, several archaeological resources have been identified within the project vicinity but not directly within the project boundaries. Many historical resources are also present. Several sites more have been identified within one mile of the project area. The proposed project consists of the construction of housing units for faculty and staff of the University. It is anticipated that there will be significant subsurface disturbance.

Jones & Stokes has also submitted a query to the Native American Heritage Commission's sacred lands database. We would appreciate being notified of any information you have regarding cultural resources that may exist in or near this area. Please feel free to contact me at 510.433.8962, extension 5968.

Sincerely,

Barbra Siskin
Jones & Stokes Archaeologist
